Michael Agunbiade

Software Development Student

Malmö, Sweden | +45 28 26 77 36 | Agunbiademichael2017@gmail.com
Portfolio: michael-agunbiade.vercel.app | GitHub: github.com/dev-Mikcidy | LinkedIn: linkedin.com/in/michael-agunbiade

Profile

Third-year Software Development student at Kristianstad University with practical experience in full-stack web development, Android development and desktop application development through academic, team and personal projects. Experienced with JavaScript, Python, Java and Kotlin, with hands-on experience using React, Node.js, Express, MongoDB, Jetpack Compose and Git. Currently seeking a software development internship to apply my skills, learn from experienced developers and contribute to real-world software projects.

Technical Skills

Programming Languages	JavaScript • Python • Java • Kotlin • HTML • CSS
Frontend	React • Vite • React Router • Axios • Bootstrap
Backend & Databases	Node.js • Express.js • MongoDB • Mongoose • REST APIs • JWT • Firebase
Android	Android • Jetpack Compose • Retrofit • Kotlin Coroutines • MVVM
Tools & Other	Git • GitHub • Stripe • PyQt5 • scikit-learn • Jira • Object-Oriented Programming

Projects

SmartHomeGitOps — Android Application | **Aug 2026 – Sep 2026**
Technologies: Kotlin • Jetpack Compose • MVVM • Retrofit • Kotlin Coroutines • GitHub REST API
Android application that communicates with the GitHub REST API to monitor repository activity and identify potentially suspicious Pull Request comments.

Hair Salon Booking System — Full-Stack Web Application | **Mar 2026 – May 2026**
Technologies: React • Node.js • Express.js • MongoDB • Mongoose • JWT • Stripe • Git
Personal full-stack application supporting customer bookings, authentication, service and booking management, and automated booking updates.

Electronics Online Store — Full-Stack MERN Application • Team Project | **Mar 2026 – May 2026**
Technologies: JavaScript • React • Node.js • Express.js • MongoDB • Mongoose • JWT • Stripe • Git/GitHub
Team project for a full-stack electronics e-commerce application with product browsing, shopping cart, user accounts, payments and order management.

SoulSync — Desktop Application • Team Project | **Jan 2025 – Mar 2025**
Technologies: Python • PyQt5 • Firebase • Jira • Object-Oriented Programming
Team-based desktop application focused on mood and stress tracking, journaling and personalized tips and quotes.

Education

BSc in Software Development
Kristianstad University, Sweden | 2024 – 2027 (Ongoing)
Focus on software development, programming, software engineering, web development, mobile development, databases and application development.
